

Thanks for your interest in the online econ class. Some of the things you need to consider for an online class.

1] Good computer and computer skills.

2] Ability to work in Georgia view/vista.

3] All the quizzes, assignments, and discussions will be online thru Georgia view/vista BUT ALL THE EXAMS WILL BE ON CAMPUS.

4] Good quantitative skills as the economics course will have equations, formulas, graphs, etc. This is not an easy class.

5] Microeconomics is an applied course. You are expected to know basic math and have skills to work out algebraic equations and derive graphs etc.

6] All the quizzes, assignments, discussion, and exams are timed. Every week I will assess you with a quiz, assignment, and a discussion for each chapter. These will be assigned back to back with deadlines. So please be prepared.

7] You need to reserve enough time for this class and for all the work

Also, please check out the syllabus for the spring online class on my GC webpage sometime in December.

Hope this information helps.

Thanks,

Dr.Joshi
